

“SMOOTH JAZZ,
SMOOTH VISION.”

“That’s my style.”

KODAK
UNIQUE PROGRESSIVE
CUSTOMIZED FOR
SMOOTH VISUAL
PERFORMANCE

Front and back surfaces
smoothly synchronized.

All visual corrections are combined and applied to the back surface of the lens using state-of-the-art technology.

This gives your patients:

- Smooth gradation of power.
- Gentle binocular balance.
- Guaranteed near vision performance.

Wavefront lens authentication.

The visual performance of KODAK Unique Lenses is verified using the latest wavefront technology.

KODAK UNIQUE PROGRESSIVE
Customization Meets Precision.

Elegant progressive design and production technology.

Vision First Design™ and highly sophisticated geometries are the backbone of the design philosophy. The result:

- Broad field of view; clear distance area.
- Instant adaptation.
- Quick, clear object recognition in the periphery.
- Visual quality comparable to a single vision lens.

Digital Resolution Technology™ ensures quality optics.

Computer-controlled "intelligent" production enhances lens surface quality. Second generation toric technology and CNC-controlled production increases optical precision.

A direct line from the computer to final lens guarantees accuracy. High-speed cutting and integrated surfacing technologies are additional manufacturing refinements. It's no wonder that KODAK Unique Lenses can be manufactured to tolerances up to 1/100th diopter.

Design optimized for frame size and shape.

The lens design is automatically customized for the patient's frame selection. This ensures the best overall visual performance for nearly any B measurement, large or very small.

Just provide the frame selection, monocular PD and fitting height. The frame should allow at least 10mm above the fitting point for distance and 13mm fitting height for near.

KODAK CleAR™ Anti-Reflective Coating eliminates reflections and improves visual acuity.

KODAK Unique Lenses are available with the award-winning KODAK CleAR Coating. They're easy to clean, resist oily smudges and dirt and are highly durable to stand up over the life of the prescription.

KODAK UNIQUE PROGRESSIVE

A wide choice of materials is available through your lab.

Complete Range of Photochromics

Transitions® 1.60 Gray and Brown*
Transitions 1.67 Gray Only
Transitions Next Generation™ Gray and Brown
Transitions V Polycarbonate Gray and Brown
Transitions Trivex™ Gray and Brown
InstaShades® PolyClear® Gray and Brown
InstaShades EvoClear® Gray and Brown, 1.6
InstaShades EvoClear Gray and Brown, 1.56
Corning® SunSensors® Gray and Brown, 1.56
Life Ra™ Polycarbonate Gray and Brown*

Polarized Lenses for Comfort and Protection

Driverwear®
SA PolarShades™ Gray and Brown, Standard Resin
SA PolarShades Gray and Brown, 1.60*
SA PolarShades Gray and Brown, 1.67
SA PolarShades Polycarbonate Gray and Brown

Thin, Lightweight Lenses that Facilitate Drill Mounting

TLX 1.6™
PolyClear
Trivex
1.67 High Index
1.74 High Index (Canada only)
InstaShades PolyClear Gray and Brown
Transitions Trivex Gray and Brown
Transitions V Polycarbonate Gray and Brown
Life Ra Polycarbonate Gray and Brown

Mid-Index and Standard Materials

1.56 EvoClear
Standard Resin

PracticePlus®: The powerful practice builder.

PracticePlus has strengthened thousands of independent vision care practices like yours.

PracticePlus members receive \$10 for every pair of qualifying **KODAK** Progressive Lenses dispensed and redeemed. For details, call 800-950-5367 or visit www.practiceplus.net
